Task 3

Output:

The image shows a web browser window with a portfolio website. The website has a dark blue header with the name 'Jawad Ahmed' in white, bold text, and the subtitle 'Future Full Stack Developer' below it. A dark grey navigation bar contains four links: 'Home', 'About', 'Skills', and 'Contact'. The main content area is white and features four sections: 'Home' with a welcome message, 'About Me' with a statement about learning web development, 'Skills' with a bulleted list of HTML, CSS, and Python, and 'Contact' with a form for name, email, and message. A 'Send' button is located at the bottom left of the contact form.

Conclusion:

During this week, I completed three web development tasks. First, I created a basic static multi-section webpage using HTML. Then, I developed the basic portfolio using HTML. Finally, I improved the portfolio by adding the CSS styling. These activities improved my understanding of webpage structure, HTML elements, and basic CSS styling. The tasks also enhanced my practical web development skills and prepared me for more advanced frontend development projects.
